10:30 – 12:00	Interactive Experience: Multi-Player Forecasting Games
12:00 – 1:00	Working Lunch
1:00 – 2:00	From Insights to Action: How Do We Respond?
2:00 – 2:30	Closure

The MathScience Innovation Center provides an annual community event focused on futuristic STEM forecasts. Designed for educational and community leadership, this event enables discussion of the impact of projected changes on citizens and the workplace, implications for the K-12 curriculum, and the advocacy needed for implementation of a futuristic curriculum.

Join Jason Tester, *Institute For The Future*, as he discusses global forecasting and research on Super Empowered Human Individual skills and takes us through multi-player simulations. The *Institute for the Future* has 40 years experience forecasting—and inventing—the future. This work has always involved a combination of technological development and experimentation along with innovative methods for forecasting social, economical, and technological change. See how these skill set needs will impact how students need to be taught now.
